

4.4 NOTES: Graphing Square Root Functions

Graph the parent square root function on the graph below. Create a table of values to graph and write the domain and range. Then using **4 different** colors graph the transformed equations and fill in the table below.

Parent Function

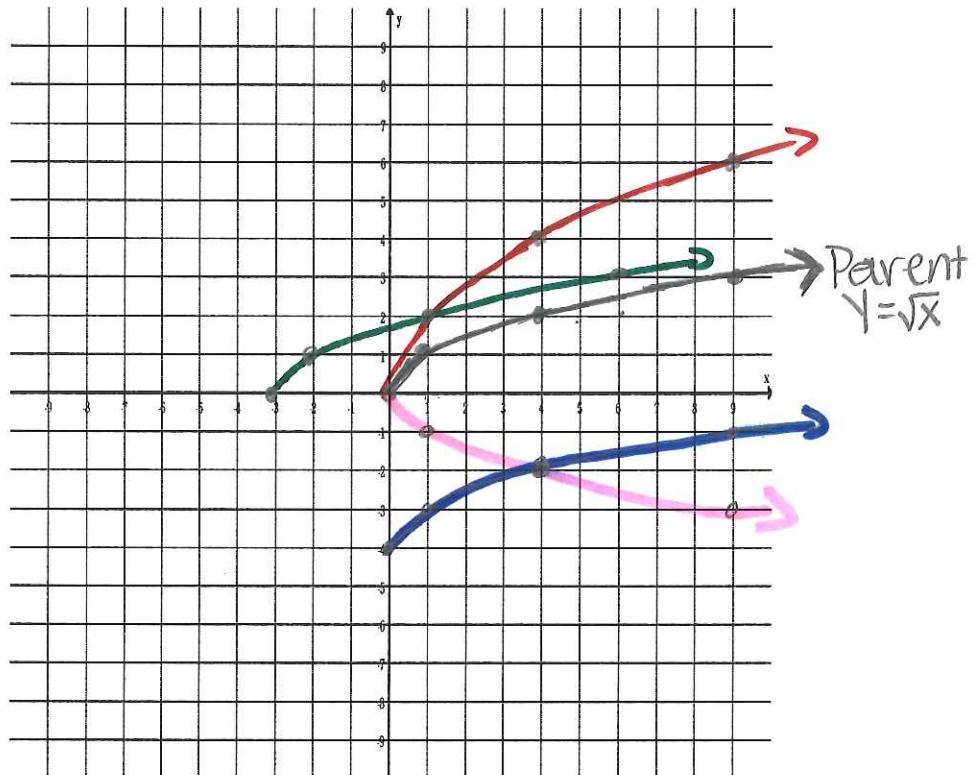

$$y = \sqrt{x}$$

$$x \geq 0$$

$$y = a\sqrt{x-h} + k$$

Fill in the missing information in the table below. You may use a calculator to check.

Equation	$y = \sqrt{x} + 6$	$y = \sqrt{x - 5}$	$y = \frac{1}{3}\sqrt{x}$
Domain	$x \geq 0$	$x \geq 5$	$x \geq 0$
Range	$y \geq 6$	$y \geq 0$	$y \geq 0$
Transformations	up 6	right 5	vert. shrink

Given: $y = a\sqrt{x-h} + k$, explain the change to the parent graph $y = \sqrt{x}$ for each:

if $0 < |a| < 1$ vert. Shrink if $\sqrt{x} + k$ up

if $|a| > 0$ Vert. Stretch if $\sqrt{x-k}$ down

Without your calculator, fill in the missing information and give the domain and range.
